ABOUT ME

Telecommunications Engineer moving into Back-end development: Python (Django REST Framework, PostgreSQL) in production-style projects, currently learning Java and Spring Boot. I bring practical experience automating test systems, processing data with Python, and writing clean code to build practical solutions. Proactive, quick learner, and ready to get involved in real development projects from day one.

WORK EXPERIENCE

RF AND SOFTWARE ENGINEER (FULL-TIME) – AICOX SOLUCIONES – 01/06/2025 – Current – MADRID, SPAIN

• Built automated testing scripts in Python, cutting down manual bench testing and making station measurements consistent.
• Processed and analyzed RF datasets with Python to evaluate performance and produce automated test reports.
• SPAINSAT NG secure communications satellite program (Hisdesat – Airbus, 01/2024 – 01/2026): characterized and tested antenna subsystems, performed performance measurements and functional parameter validation, and automated the processing of large test datasets with Python for official engineering validation reports.
• Spanish Ministry of Defence (CESTIC, 01/2026 – Present): technical support and operational testing of secure communications systems, developing automated Python routines for measurement cycles and data capture, and supporting ground station verification, instrument calibration and troubleshooting.
• Prepared technical reports, test procedures, and system documentation following project specifications.
• Worked directly with clients and on-site engineering teams during system commissioning, handled test result reviews, and covered on-call shifts to resolve live operational incidents.

RF ENGINEERING INTERN (PART-TIME, ALONGSIDE BACHELOR'S DEGREE) – AICOX SOLUCIONES – 08/05/2023 – 31/05/2025 – MADRID, SPAIN

• Assisted in execution of RF characterization and system tests at satellite ground stations.
• Operated, calibrated, and maintained electronic measurement instruments and RF test benches.
• Collaborated on technical documentation, wiring schematics, and system layouts for engineering projects.

PROJECTS

01/10/2026 – CURRENT

SmartCloset – Intelligent Digital Wardrobe & Async Backend – Personal Project

Personal full-stack and back-end development project designed to streamline wardrobe management through automated catalog ingestion and asynchronous workflows. I designed and implemented a modular REST API using Python and Django REST Framework, structuring a relational database in PostgreSQL to model complex user, clothing, and outfit relationships. To keep the application responsive, I integrated Celery with Redis for background task queues, handling web scraping routines and background removal using local ONNX computer vision models, as well as integrating external third-party weather APIs for outfit recommendations.

EDUCATION AND TRAINING

01/09/2021 – 30/06/2025 Madrid, Spain

BACHELOR'S DEGREE IN TELECOMMUNICATION TECHNOLOGIES AND SERVICES ENGINEERING

Universidad Autónoma de Madrid (UAM) - Escuela Politécnica Superior

Website https://www.uam.es |

Field of study Telecommunications degree with focus on programming, networks, and computer systems. Bachelor's Thesis: RF testing, characterization, and compliance analysis of antenna systems.

SKILLS

Java Foundations | Spring Boot (Currently learning) | Python | Django REST Framework | C | Git | PostgreSQL | Postman | MATLAB | Redis | Celery | Linux | Windows, GNU/Linux, MacOS | Database: MySql, Sqlite3 | Digital signal processing | Circuit analysis | Antenna design (ADS and CST)

LANGUAGE SKILLS

Mother tongue(s): **SPANISH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DRIVING LICENCE

Driving Licence: B | 10/06/2022
